

# C3-Cloud system: an innovative digital integrated care tool developed with and for multimorbid patients

---

Dolores Verdoy

Institute for Health Service Research Kronikgune

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 689181

#EHMA2020

# C3-Cloud project

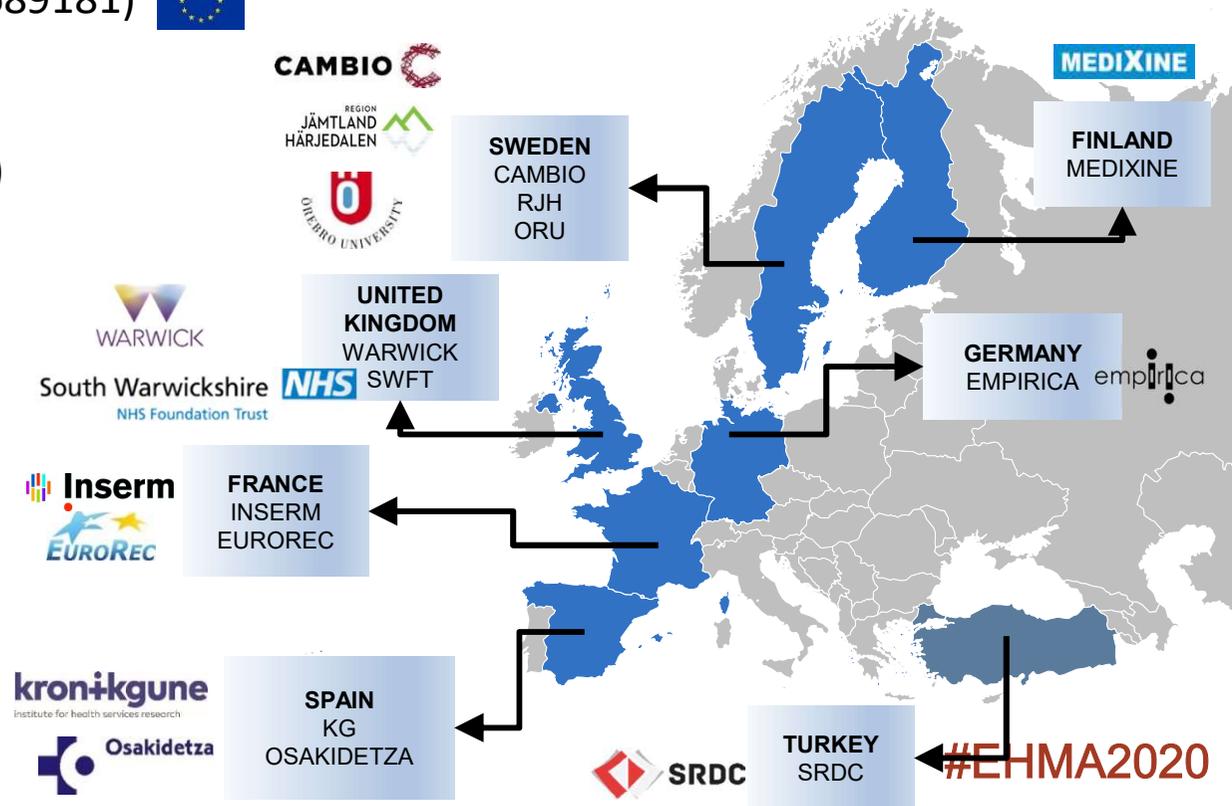

**Title:** A Federated Collaborative Care Cure Cloud Architecture for Addressing the Needs of Multi-morbidity and Managing Poly-pharmacy (GA 689181) 

**Call:** PHC-25-2015, H2020, EU

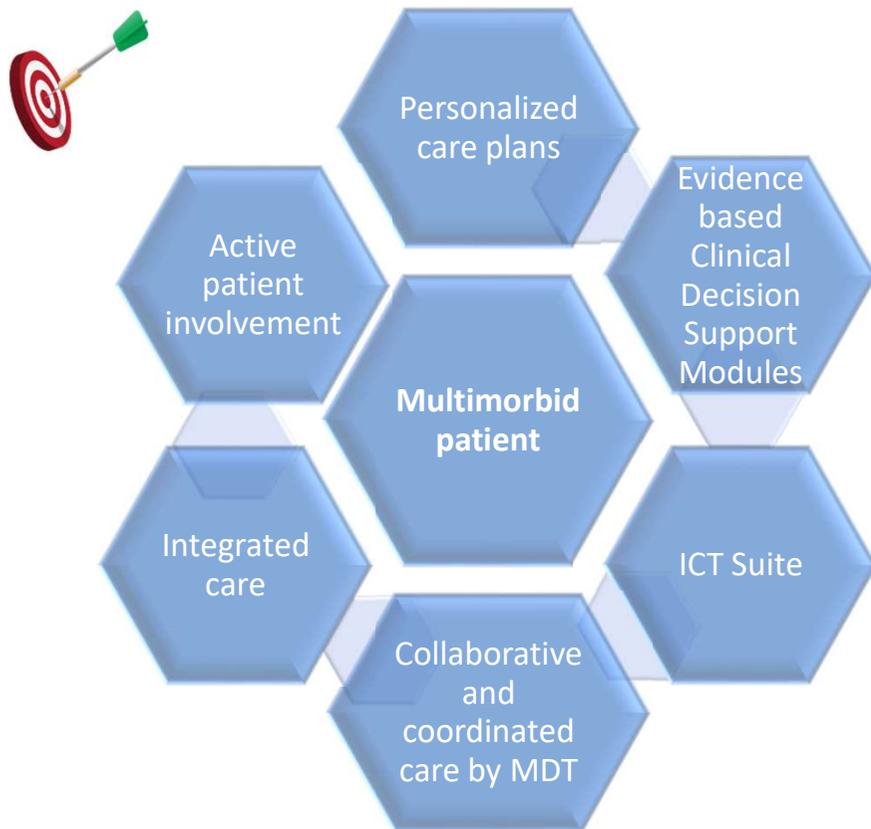

**Duration:** 52 months (May 2016-August 2020)

**Coordinator:** University of Warwick

**Consortium:** 12 Partners from 9 countries

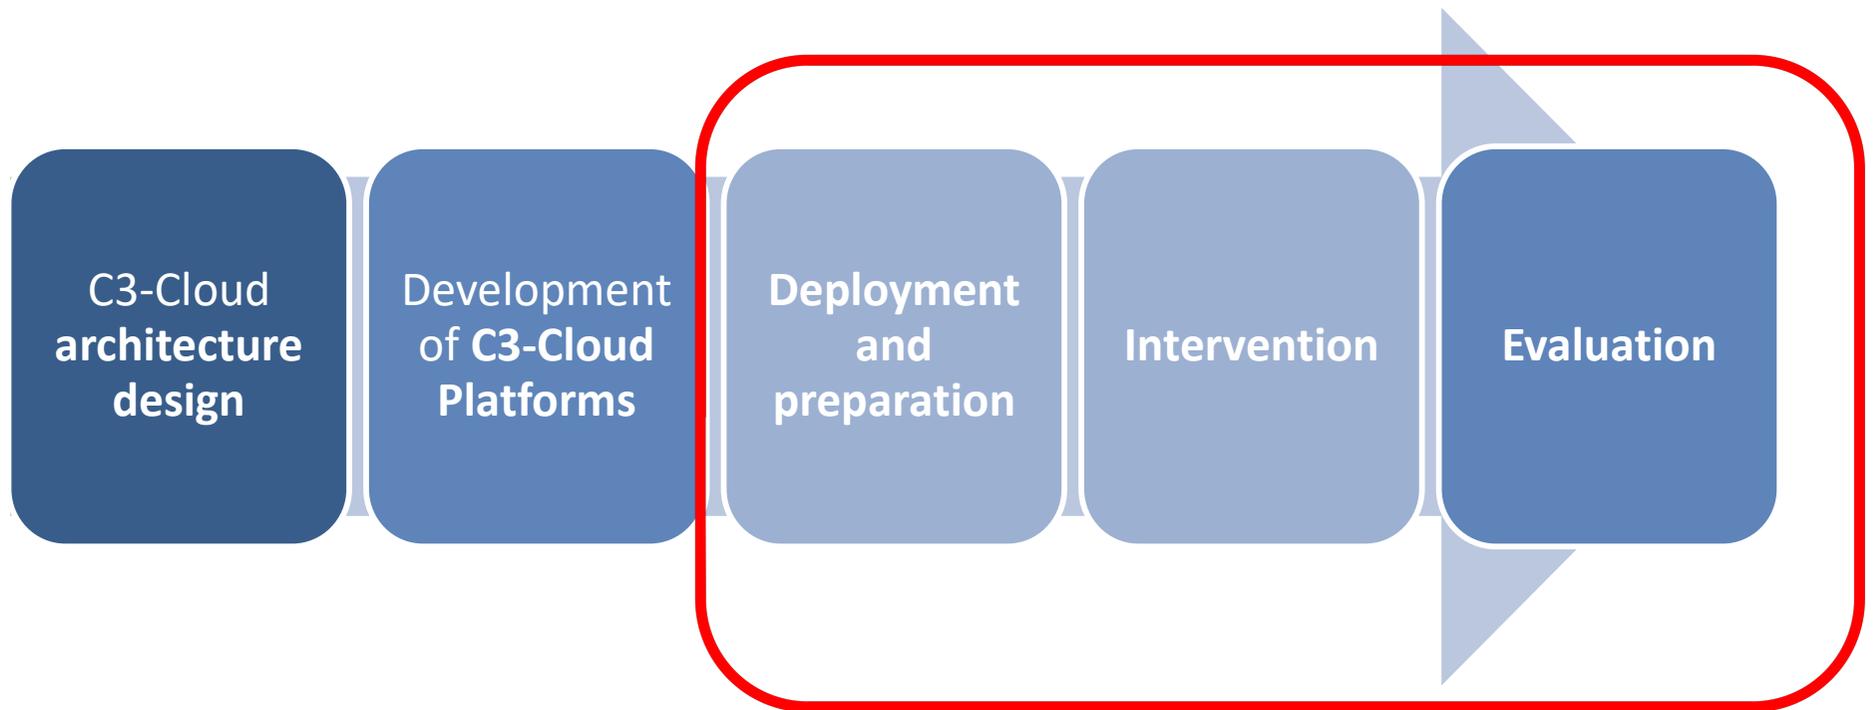

# C3-Cloud Goal

**Feasibility in three European regions**

#EHMA2020

# C3-Cloud phases

#EHMA2020

# Preparation

- Aim: to ensure readiness of the sites for the deployment before the trial
  - ✓ Install, integrate, configure and testing the C3-Cloud ICT component in each site
  - ✓ Ensure the readiness of the main organizational aspects for the intervention

# Research question

The research question for the evaluation of the C3-Cloud technology trial is:

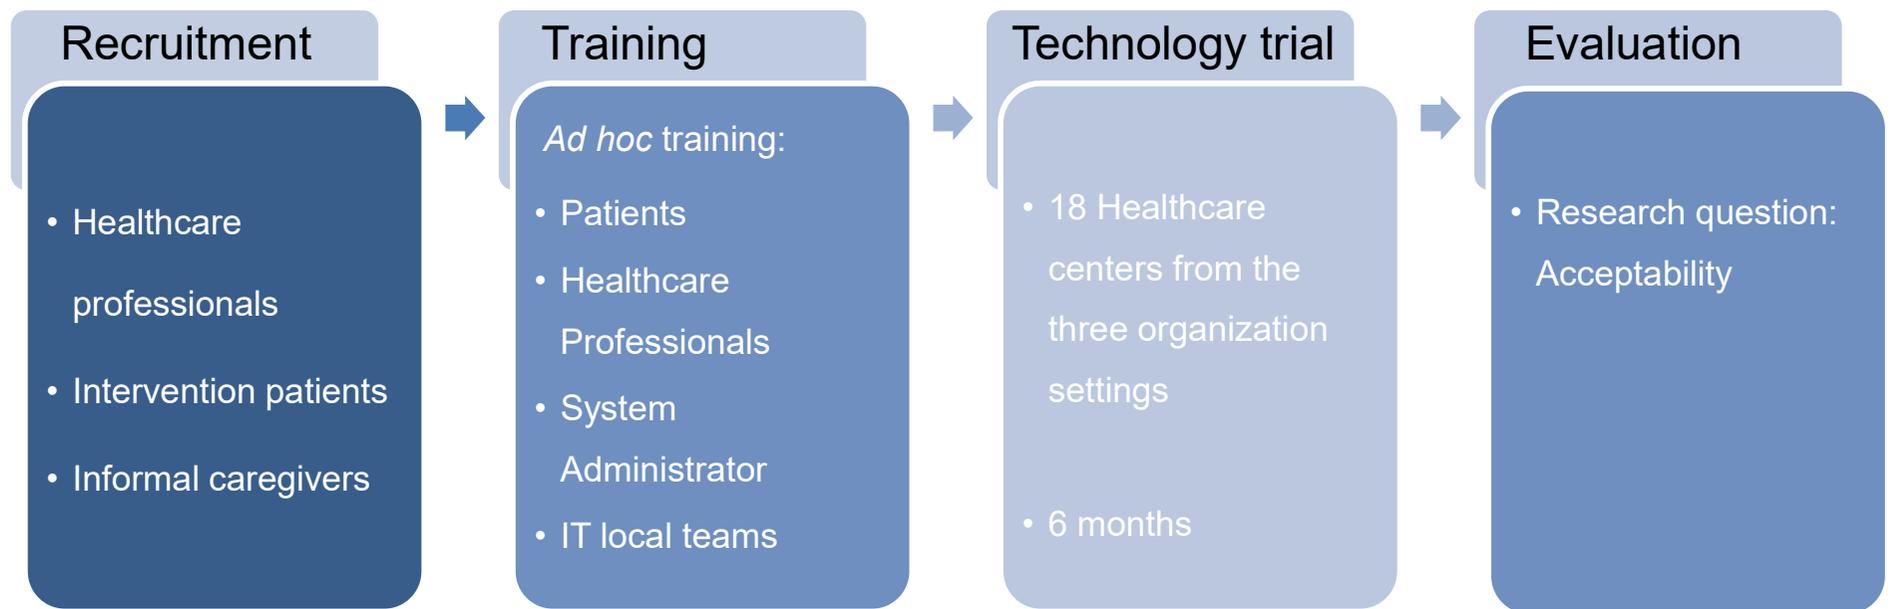

“Is the use of a personalised ICT tool that facilitates coordinated care planning, treatment optimisation and patient self-management **acceptable** to patients with multiple long-term conditions and their team of health professionals?”

#EHMA2020

# C3-Cloud Intervention

Implementation of C3-Cloud technology trial across three organizational settings in Europe and their evaluation

#EHMA2020

# Results - Core Training material

- C3-Cloud Introductory video
- Online video tutorials
- Wallet card
- Project user Guidebooks
- User manual
- Demo version
- User Manual for Pilot Site Coordinator
- Technical manuals

”  
“ **Trusted**

”  
“ **Helpful**

”  
“ **Easy to understand**

”  
“ **Make more concise**

#EHMA2020

# Results – Acceptance, User Experience and Usefulness

“ Easy to learn C3-Cloud

“ Want to use C3-Cloud in the future

“ Supportive organizations

“ Large potential for care planning

“ Useful for the daily job

“ Could not put C3-Cloud to full use

“ Worth the effort

“ May not enhance productivity

#EHMA2020

# Results – Budget Impact Analysis

- Discrete event simulation was developed
- Statistical analysis of collected data to find significant differences in healthcare resource consumption
- Projection of the significant differences over time

 Nurse telephone consultations  
1.6 times more likely

 GP visits 0.63 times  
less likely

 Nurse visits 0.74 times  
less likely

 Nurse home visits 0.45  
times less likely

 Use of A&E units 0.57  
times less likely

# Lessons learnt: tips for C3-Cloud adoption

- The deployment and use of the C3-Cloud requires a **prepared environment**
- **Organisational and culture changes** are needed to adopt and get best value from the C3-Cloud solutions
- Multidisciplinary teams need to be **trained** not only in how to use the application but in how to work in a care plan oriented way
- A **culture supportive of patient engagement** and of an empowering relationship between clinicians and patients is a critical success factor
- A certain level of **ICT maturity** is needed in order for the C3-Cloud solution to be appropriately and effectively used

#EHMA2020
