

improve health for all

THE COST OF HOSPITAL **HEALTHCARE WORKERS' POOR HEALTH**

Project Valoris – EHESP & MNH Foundation Nicolas SIRVEN & Emilie CHEN **EHESP** June 6, 2025

THE COSTS OF CAREGIVERS' HEALTH

Background

- The Bataille-Hembert et al. report (2023)
- Work conditions → loss of health and productivity

Research question

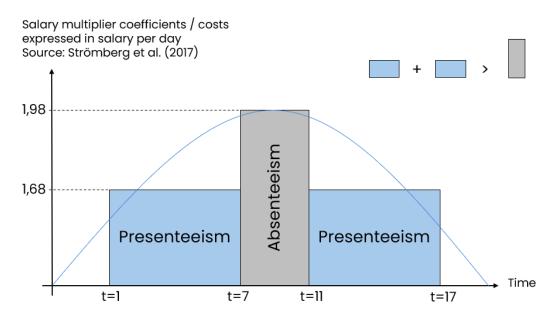

- What is the amount (in €) of these losses?
- From the employer's perspective (for arbitration)

Methodology (direct and indirect costs)

- Strömberg et al. (2017) in Sweden
- Individual questionnaire for managers

Results from international literature

Prevalence rates: Absenteeism = 8.8%; Presenteeism = 66.1%

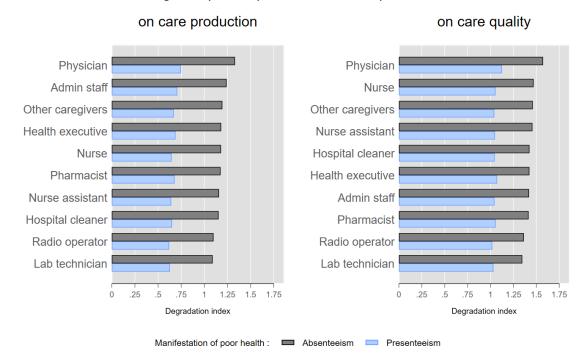

Public sector, Hospital health professionals

Source: European Working Conditions Survey (EWCS, 2021)

Preliminary results for France (1/2)

Fig.2. Impact of poor health on hospital staff

Preliminary results for France (2/2)

Table 1: Losses due to poor health of caregivers

	Productivity			Cost
Surgery (non-cardiac)	Lost income /stay	Nb of stays lost /day	% stays lost /day	Wage mult. /day
Absenteeism	-	-	-	
Health cleaner	2 102€	8.9	26.9	1.37
Health executive	2 118€	8.9	27.1	1.37
Nurse	2 066€	8.7	26.4	1.36
Nurse assistant	2 031€	8.6	26.0	1.35
Physician	2 628€	11.1	33.6	1.51
Presenteeism				
Health cleaner	871€	4.9	14.9	1.17
Health executive	931€	5.2	15.9	1.19
Nurse	867€	4.9	14.8	1.17
Nurse assistant	877€	4.9	15.0	1.18
Physician	1 182€	6.6	20.2	1.25
